## Soft Touch Hybrid Gloves Powder-Free EN455

The Soft Touch Hybrid poly gloves are beneficial for preventing allergic reactions among workers and customers, made from polyethylene (PE) that is giving to gloves a direct touch food that is ingested by not releasing unwanted chemicals into food or sensitive item during a daily work life or personal, home, hobby, arts, crafts and urban life safety use.

Excellent fit, good sensitivity and dexterity for fine tasks

The entire glove is finely textured (including palms and fingers) to provide consistent grip on glass wear, small objects, instruments and tools.

The gloves are empowered by silver ions fabric for sensitive and comfortable touch and reduces slipping risks. It prevents odor from getting on your hands and getting your hands dirty.

It is ideal for all kinds of uses that require a safe and hygienic environment.

Ideal for almost any application including Tattooing, Food & Beverage industries and Preparation, Painting, Cleaning, Pet Care, Home Improvement, Hobbies, Consumer services as SPA, Beauty centres, Hairdressers, Arts & Crafts and urban life safety .

Convenient dispense pack keeps gloves clean and organized while providing easy access

Protection (EN455-1-2) against viruses & biological agents for Hospitals, Clinics & High hygienic instructions areas according to Directive 93/42/EC on medical devices (DDM 93/42), published in the Official Journal in June 1993.
